Deaths	1,009	230	161	70	27					

"*" Denotes less than 3.

Area 4 county Stats are current thru: 5/31/2016

Area 4 Department of Corrections cases have been excluded.

All numbers on report are cumulative from date disease became reportable. National Statistics: www.cdc.gov/hiv/stats.htm

Florida Law (s.384.25, F.S.) requires cases of AIDS to be reported by anyone who diagnoses or treats a person with AIDS.

A person who tests positive for Human Immunodeficiency Virus (HIV) on or after July 1, 1997 is also reportable.

Current HIV Infection data by year of report reflects any case meeting the CDC definition of 'HIV infection' which includes all newly reported HIV cases and newly reported AIDS cases with no previous report of HIV in Florida.

If a case is later identified as being previously diagnosed and reported from another state, the case will no longer be reflected as a Florida case and the data will be adjusted accordingly.

Data from the most recent calendar year (2015) are considered provisional and therefore should not be used to confirm or rule out an increase in newly reported cases in FL.

The final year-end numbers are generated in July of the following year (2016), after duplicate cases are removed from the dataset, as is customary of HIV surveillance in the US.

Confidentiality is strictly enforced & guaranteed. Please comply with all information security and mailing protocols.

Submit your HIV/AIDS case reports(s) in an envelope marked "CONFIDENTIAL" to any of the following personnel:

Name	Title	Phone #
